SUB 'N' UP OCTAVER

Next-Generation Polyphonic Octave Pedal with Monophonic Octaver and Built-In TonePrint Technology

- Next-generation octave pedal offers flawless polyphonic tracking, a monophonic octaver and built-in TonePrint technology
- Advanced polyphonic octave engine gives you lightning-fast note tracking and impeccable octave tones
- Cool monophonic octaver replicates that classic old-school octave pedal flavor
- TonePrint-enabled to let you beam cool signature tones into your pedal with the free TonePrint App
- Design your own customized effects from scratch with free TonePrint Editor for PC, Mac* and iPad*
- True bypass allows for optimum clarity and zero high-end loss when the pedal is off
- Optional buffered bypass mode prevents high frequency loss from long cable runs
- Kill-Dry feature removes the dry signal path for use with parallel effects loops
- PA-rattling Sub 2 control knob brings in a signal 2 octaves below your original tone for powerful impact
- Simple, easy-to-use controls let you focus on playing
- Compact format fits on any pedal board

SUB 'N' UP OCTAVER is the new leader of the pitch-pack. Featuring our superb next generation octave-engine and individual blend controls for dry, octave-up and two sub-octaves, SUB 'N' UP is set to deliver flawless octave tones whether you're playing complex chords or groovy single-note lines. And with the option of adding modulation to the mix via our high-powered TonePrint editor, for spacey ambient octaves, SUB 'N' UP OCTAVER truly is the definition of pitch perfection.

- Next generation octave engine - For flawless polyphonic tracking
- Cool old-school monophonic octaver
- TonePrint-engine with modulation - for otherworldly octave tones

SUB 'N' UP OCTAVER

Next-Generation Polyphonic Octave Pedal with Monophonic Octaver and Built-In TonePrint Technology

- High-quality components to give you flawless octave tones in a pedal format
- 3-Year Warranty Program*
- Designed and engineered in Denmark

Polyphonic Epiphany

SUB 'N' UP features the latest in polyphonic pitch technology. This means you get lightning-fast note tracking and impeccable hi-fi octave tones when playing chords. So whether you're into shimmering octave-up tones for swells, a sweet 12-string ring or down and dirty subsonic octave riffs, SUB 'N' UP OCTAVER will deliver the goods every single time!

Old-School is Always Cool

SUB 'N' UP OCTAVER also gives you access to a cool monophonic octaver. Great for faux bass-lines with a guitar or for replicating the glorious glitchy imperfections of yesteryears octave pedals. Or!!... hook it up to a bass, crank the two sub signals, and get ready to bring down the PA.

TonePrint Technology

TonePrint – Otherworldly Octaves

If the next-generation octave engine puts SUB 'N' UP OCTAVER ahead of the curve, then the TonePrint engine blasts it into outer space. Not only can you beam custom-made tones to the pedal via the free app, you can also make your own octave tone from scratch via the editor. This features our state-of-the-art modulation engine for never heard before octave tones. So go ahead and give that pitch some vibrato. Pitches love vibrato!

True to Tone

You love tone, so do we, and our design philosophy testifies to that. So whatever route you wanna go, we got your back. With optimized headroom, True Bypass or Buffered Bypass switch and Kill-Dry on/off, this pedal guarantees optimal tonal integrity and zero loss of tone. And, no matter if the pedal is on or off your precious dry sound is always passed through the pedal unharmed in all it's pure analog glory due to an Analog-Dry-Through.

TonePrint

TonePrint means signature effects – and signature effects means truly creative tones. From classic innovators to the guys shaping the future of music, we've asked the coolest artists around to come up with their customized signature version of a TC ELECTRONIC effect – and make them available to you for free!
